08 Tobacco Stopper

Tobacco Stopper is a cylindrical product made from special paper with corrugations to block cigarette materials. It's specifically developed for Hand-made cigarettes (SKT).

'M' Type

'N' Type

The standard size for the Tobacco Stopper is 15 mm in length and 7.75 mm in diameter with customization options available. The corrugation design varies from M-type, N-type, or tailored to specific requirements. The material options also include printed paper or color block paper, all of which are certified and classified as food-grade for use in cigarette products.

See detailed spec

Tobacco Stopper Rod

Tobacco Stopper Rod is an enhanced version of our Tobacco Stopper, made from special paper and rolled into a cylinder with internal corrugations to block cigarette materials. Designed for Machine-made Cigarettes (SKM) and Heat-not-Burn (HnB), it can be customized in size and dimensions.

Natural Tobacco Stopper Regular

Natural Tobacco Stopper (NTS) is a cylindrical filter tip made from Indonesian indigenous plants, featuring corrugations. It's tailored for Hand-Rolled Cigarettes (SKT), Pre-Rolled Filter Tips, and RYO/MYO products.

Natural Tobacco Stopper Substrat

Natural Tobacco Stopper Substrat (NTSSub) is a cylindrical filter tip made from Indonesian indigenous plants, featuring corrugations. It's designed for Hand-Rolled Cigarettes (SKT), Pre-Rolled Filter Tips, and RYO/MYO products.

Natural Tobacco Stopper Premium

Natural Tobacco Stopper (NTS) is a cylindrical filter tip made from Indonesian indigenous plants, featuring corrugations. It's tailored for Hand-Rolled Cigarettes (SKT), Pre-Rolled Filter Tips, and RYO/MYO products.

Natural Cigarette Wrap

Our Natural Cigarette Wraps offer a pure smoking experience, free from harsh chemicals or additives. Made from natural materials, they enhance the authentic flavor of your tobacco, providing a smooth, enjoyable burn that preserves the quality of your blend.

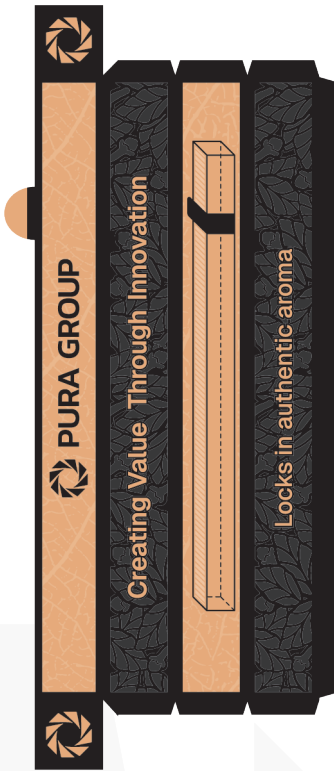

Empty Cigarette Cones

Empty Cigarette Cones (ECC) are cylindrical rolls, available in paper-based or natural leaves, designed for easy filling with tobacco. They're suitable for hand-rolling or machine filling.

09 Individual Cigarette Pack

Individual Cigarette Stick

Individual Cigarette Wrap

Individual cigarette wraps function as a protective sleeve that helps preserve the aroma and freshness of each cigarette, while also serving as a modern replacement for traditional grenjeng. Beyond protection, they provide a more exclusive and premium appearance, enhancing the overall value of the product.
